01	N/A	N/A	"Generator Shifting & Re- Connection Works: Generator shifting work is to be done from one water pump station to another as per the requirement of MODS Zone/FM Division (1&2)/Projects/Generator Division and as per requirement. Shifting works will be done following standard method of statement including proper safety rules to avoid any mechanical and electrical hazards. For this purpose, required number of ABC license holder/supervisor / electrician engaged by Contractor will disconnect the generator before shifting. Necessary tools and equipment such as Crane mounted Truck, Tripod, Chain-Pulley, Clipper-Clamper, expert labors and other requirements as per site situation will be provided by the Contractor. The shifted generator should be placed in the required pumping station in a shed/room or any suitable location instructed by the Engineer in charge. Also re-connection to be performed by the contractor supplying necessary tools, equipment as mentioned above manpower etc. After completion of reconnection of the generator, it will be used to run pump-motor sets. The cost of shifting and related works has been calculated on average basis considering variable work difficulties level and short/long distance. All works should be done as per direction of Engineer-in - Charge. The Tenderers may visit the pump station and see the generators before submitting their Tenders.
